Different types of kick plates :

and RTM side door for the transport of ice cream

NEW !

Rails and hooks for meat suspension
Monocoque side doors - Sliding partition wall
Tip-up shelves - Sliding cold strips
Front end with recess for cooling unit
Ventilation flap
Recessed bar in floor for goods retaining bar

Looking for interesting news about innovations in refrigerated transport ?

Roller Shutters for mobile applications

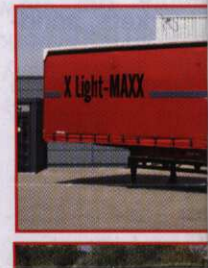

Brand new !! The Eurofreeze, the FRC roller shutter for the transport of deep frozen goods

- ideal solution for city distribution, where quick and efficient access to the loading area is of the essence (cold chain!)
 - easy assembly
 - anti finger trap for safe operation.
 - header only 200mm for maximal aperture height
 - amazing impact resistance of monocoque panel segments
 - reinforced bottom panel with kick strip mounted to inside for increased durability
 - 60mm PU insulation core for superior insulation performances
 - thermal breaks for even better insulation results
 - double seal on each panel joint to ensure maximal insulation
 - galvanised steel track for long life shutter
- FrigoKit & FrigoBox

KÖGEL

Kögel will be present at the IAA show in a familiar MAXX range of refrigerated trailers. The new X Light-MAXX is based on a new chassis kit. A range of options is included from this chassis kit. Alexander Tietjens, Management Board Member of Kögel GmbH said at the show: "The modular construction of the X Light-MAXX ensures lean manufacturing, low production costs as well as high reliability and functionality, ensuring a sustainable investment with a long life span and spare parts. The fact that the X Light-MAXX has been on the market for the last two years is proof of more than just a popular product, it has become a brand name. The Kögel MAXX product line represents the highest standards with maximum volume and pay low prices. The X Light-MAXX is a user-friendly and effective refrigerated trailer. Through the X Light-MAXX system, the Kögel MAXX offers an extended family of options. The X Light-MAXX allows a maximum of flexibility. Improvements to the X Light-MAXX at IAA include a new chassis kit and a new member of the MAXX family. The X Light-MAXX container chassis versions. At the IAA show, the X Light-MAXX rounder will be on display. Examples of the X Light-MAXX include the X Light-MAXX
