

VEICOLI LEGGERI LIGHT VEHICLES

I MODERNI SISTEMI DI GIUNZIONE TRAMITE RIVETTATURA O PER COLLAGGIO SONO SEMPRE PIU' UTILIZZATI NELL'ASSEMBLAGGIO DI KIT PREFABBRICATI PERCHE' OFFRONO INNEGABILI VANTAGGI IN TERMINI DI TEMPI E DI COSTI

- **Aluvan** di Brugge (B), costruttore di furgoni in alluminio e uno dei primi in Europa a produrli anche in kit, dispone di una delle gamme più complete di furgonature da installare principalmente su veicoli leggeri adibiti a consegne, una gamma che comprende (vedi foto):
- furgoni in lamierati d'alluminio grecati rivettati **MondoVan**;
- furgoni in lamierati d'alluminio uniti con fissaggio a colla **MKL**;
- furgoni in playwood incollato per il trasporto isolato di prodotti freschi **Mirovan**;
- furgoni in alluminio con falso telaio completi di pavimento e rivestimento interno, assemblato per collaggio **PivoPlan** (telone scorrevole da 660 gr/m²).
- furgoni della nuovissima serie con telone scorrevole **FlexoVan** (3,5 t.) e lunghezza max di 6,5 m.

ALUVAN - Laconiastraat 1 - 8000 BRUGGE (BE)

FlexoVan: the brand new curtain sider body, supplied as kit or unit. Specially designed for the light range of commercial vehicles, by the 3,5 t. specialist the 3,5 t. segment, with a maximum length of 6,5 metres: for small trucks, delivery vans, light-weight trailers.

The FlexoVan is a complete kit and its basic execution is composed of following elements:

- **Sliding curtains** with high quality roller system, efficient half turn curtain tension device, durable free-rolling curtain track, tough 600gr PVC coated 2x2 woven polyester fabric, computer generated graphics to order. Straps and buckles are attached every 600mm.
- **Sliding roof** or aluminium roof completely assembled/ready to bolt on.
- **Plywood** or aluminium front end (adopted also for the brandnew MondoVan).
- Rear frame with 2 aluminium rear doors with plant-on lock on each door leaf.

FlexoVan is the light-weight champion in the sliding curtain body category and its extremely low weight is one of the major assets of Aluvan's FlexoVan.

A 4,5 (L) 2,2 (W) 2,2 (H) meter complete FlexoVan kit (in its lightest execution: with 2 sliding curtain at the sides, a fixed roof, an aluminium front end and a galvanised rear frame with 2 rear doors with plant-on locks) does not weight more than 288 kg...for a maximum payload and a happy operator.

Easy curtain tensioning-smoothly running side curtain and roof-easy laterally opening of the roof from the outside-quick action straps-fluent handling of sliding floor supports-efficient repositioning of plank pockets-the action of opening and closing the sliding roof is an easy operation.

Only one supplier for all elements...only one delivery time...only one invoice.

A perfect guarantee for a satisfied body-builder and a happy operator.

The innovative assembly concept Easy-Fix is also adapted to the FlexoVan...for a quick and easy assembly.

Only with bolting and screwing...no welding operations required. No paintwork necessary.
